

CAB SERIES

CAB-30T / CAB-60T

Twin Photoelectric Beam Sensor

FEATURES :

- With A.G.C. (Automatic Gain Control) Circuit
- Lightning Protection
- Adjustable Beam Interruption Period (50 msec - 700 msec)
- High grade lens creates more sharply defined & precise infrared beams.
- Anti-Frost Design is incorporated to protect the detector from effect of frost & dew.

FEATURES

Rain, Fog and Snow Protection

The A.G.C. Circuit continually monitors for gradual changes in the signal's strength caused by weather conditions and adjusts the trigger level accordingly, to maintain proper sensitivity.

Protection Against Birds, insects and falling leaves

Beam interruption time can be adjusted according to the peculiarities of each installation site. When protecting a wall or fence, a long interruption time will catch intruders, but let jumping cats or small objects pass through.

Easy Installation

The pole mount brackets supplied will allow installation of two units on a pole at the same height easily.
